Enrollment Procedure for Chemistry Graduate Students

The department is formalizing the enrollment procedure for all chemistry graduate students.

Pre-dissertators: please sign up for research (Chem 990, 992, 993, 994, 996 or 998), group meeting (Chem 964, use the appropriate section for your PI), and seminar (Chem 900, 920, 940, or 960), in addition to lecture courses (if needed). Total credits should be 8-15 for fall and spring and 2 credits for summer.

Dissertators: please sign up for 2 credits of research (Chem 990, 992, 993, 994, 996 or 998), 1 credit of group meeting (Chem 964, use the appropriate section for your PI), and 0 credits of seminar (Chem 900, 920, 940, or 960). This is new: previously dissertators were only advised to sign up for 3 credits of research (although there was variation). Total credit should be 3 for fall, spring, and summer.

Please contact Arrietta (awclauss@wisc.edu) if you have any questions.

For more details about the enrollment requirements set by the Graduate School, see https://grad.wisc.edu/acadpolicy/#enrollmentrequirements

Explanation: Beginning with the Spring 2018 semester, the university must report to the UW-System and the Wisconsin legislature on the instructional workload for every faculty and staff member. The data for this exercise will come from the timetable and will be based on enrollments in courses at a specific time point each semester. In order for the department to fully represent the time that we spend in student contact, it is important that our group meetings and seminars are populated with the true “enrollments” for these activities.

Your cooperation in enrolling correctly is greatly appreciated.
