CHEMISTRY 343

Summer 2006

10:20-11:35, M T W R

Room 1361 Chemistry

Instructor: Dr. Michael (Mike) Weaver
Office: 2128 Chemistry Building (Summer Session Only)
E-mail: weaver@chem.wisc.edu    Web Page: http://www.chem.wisc.edu/courses/343/Weaver

Office Hours: 8:30-9:30 AM Monday-Wednesday (or by appointment)

Structure of Course:

I. TEXT
   "Organic Chemistry," 8th Ed., by Solomons and Fryhle
   (Strongly recommended: study guide and molecular models)

II. EXAMS
   A. Three exams during lecture time (100 pts each)
      Thursday July 6
      Thursday July 20
      Thursday August 3

   (Note: There will be no make-up exams unless arrangements are made in advance.)

   B. Final exam during lecture time (cumulative; 100 pts)
      Thursday August 10

III. QUIZZES
    There will be four quizzes worth 100 total points over the course of the semester.

IV. GRADING
    Grades will be assigned on the basis of a 500 pt total, using a curve that leads to a
    distribution similar to those of other recent and contemporary Chemistry 343 sections.

V. PROBLEMS
    Students should do all relevant problems from the text. Written answers will not be
    collected or graded, but problems can be discussed at the review sessions and during office
    hours. Only by doing these problems, and then evaluating your answers, can you master the
    material in this course. You should do all of the problems which appear in the text as you read
    the chapter. In addition, an extensive list of recommended problems from the end of the
    chapters will be provided.
